

ABOUT EXO CHECKOUT

EXO Checkout is an innovative retail solution that leverages RFID technology for lightning-fast checkout. Unlike conventional barcode scanning, which takes 3 to 6 seconds per item, EXO instantly scans all a customer's merchandise, eliminating the need for individual barcode scans. This reduces transaction times from minutes to seconds, providing an elevated shopping experience that leaves customers impressed.

The impact of EXO Checkout is particularly evident in speed-focused environments, such as sports arenas, theme parks, venues and attractions. The success of EXO is evident in the results experienced by our customers who have seen a 10-20% increase in sales during peak times. By removing the deterrent of long lines, customers no longer abandon their purchases in order to get back to the action.

One of EXO's key differentiators for retailers is its POS agnostic approach. Instead of imposing new POS systems, EXO reduces the barrier to entry by integrating with existing POS infrastructure, enabling retailers to retain their current setup while harnessing the power of EXO Checkout.

As the retail landscape evolves, EXO stays committed to leading technological innovation and reshaping the retail experience to meet the demands of the modern consumer.

EXO Solutions is a spin-off of **STARK RFID**, headquartered in Greenville, SC, with extensive expertise in event and venue management solutions for top global brands. As an expert in RFID and auto-identification technologies, STARK empowers premier venues and events to provide secure and flexible access control, engaging patron experiences, real-time visibility, and post-event analytics. This comprehensive approach optimizes operations and offers deeper insights into guest behavior.
